August 13, 2026

East Central Fire & EMS Territory Board Members,

East Central Fire & EMS conducted extensive interview processes over the last couple of months, to fill three lieutenant positions. The following Candidates were approved on August 4, by the East Central Fire & EMS Merit Board. Chief Call is requesting the East Central Fire & EMS Territory Board approve the following three Candidates.

Augustine Wyss-Lieutenant/Paramedic Probationary-\$23.68

Goeff Ellingwood-Lieutenant/Paramedic Probationary-\$23.68

Zach Thiel-Lieutenant/Advanced EMT Probationary-\$23.06

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Call". The signature is fluid and cursive, with the first name "Doug" being more prominent than the last name "Call".

Doug Call- Chief of Fire & EMS

About OneTest™

About OneTest™

HOW DOES OneTest™ WORK?

OneTest™ is a blood test and machine learning algorithm developed to aid in the detection of multiple cancers.

The foundation of OneTest™ is a panel of protein biomarkers. Unlike genetic tests that predict your lifetime risk of getting cancer, OneTest™ measures current cancer markers (tumor-associated proteins secreted by tumors as they grow).

These biomarkers have been widely used for cancer screening outside of the U.S., especially in the Far East (Japan, South Korea, China) for decades. In that region, tens of millions of individuals receive what are often day-long health check-ups that include blood tests that measure the levels of the same biomarkers that are part of OneTest™.

The OneTest™ algorithm was built using machine learning to interpret real-world data from over 27,000 individuals. The algorithm significantly improves the interpretation of tumor biomarker data allowing for enhanced prediction of cancer risk.

WHY GET TESTED?

For most cancers, early detection saves lives

For example, lung cancer--the world's #1 cancer killer--has survival rates that exceed 90% when detected early, according to a landmark study published in the New England Journal of Medicine. On the other hand, lung cancers detected in late stages (stage IVb) have survival rates that fall below 1% according to the American Cancer Society. Dozens of similar studies have concluded similar patterns of outcomes for pancreatic, colon, kidney, ovarian, and most other tumor types. Early detection offers substantial survival benefits. The biomarkers measured as part of OneTest™ (AFP, CEA, PSA, CA 19-9, CA 125, CA 15-3, and CYFRA 21-1) are associated with the presence of different malignancies and have the potential to detect cancers in asymptomatic persons when cancers are in early development and may have better outcomes. See Accuracy, Reliability, & Scientific Support.

WHO MIGHT BENEFIT FROM OneTest™?

One's risk of developing cancer increases significantly with age. Persons may also have elevated risk due to other factors, such as family history or who have occupational exposure to toxic carcinogens.

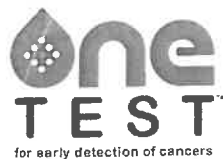

HOW OFTEN TO TEST?

Annual Testing May Help Identify Important Changes

Frequency of testing is a function of age, family history of cancer, and environment/occupational exposures. For most middle-aged individuals, annual testing is suggested.

Studies have shown that significant changes in biomarker levels can be observed years before a cancer diagnosis is made. Annual testing may help identify changes in biomarkers which may be due to a developing tumor.

Health experts in countries where biomarker cancer screening is commonplace believe that yearly testing is an optimal way to improve early stage detection rates.

Comments from Amy Colton

Thank you for giving OneTest the opportunity to quote on your testing. I have applied the best discounts to give you the best pricing available to your team. Check back when you are ready to get started as additional promotions may be available to you.

This is your quote for OneTest PREMIUM. I will provide your pricing for OneTest Standard under a separate quote to make it less confusing.

This is priced for venous collection. You would need to provide your own needles & centrifuge. Capillary Collection is now available for a modest additional charge per person as an alternative to traditional venous blood draw allowing maximum flexibility in drawing your screening at a great price point.

Shipping costs may go up or down depending on the actual number of return shipments needed. Quoted pricing is just an estimate based on history of other departments of similar size.

In good health,
Amy

Products & Services

Item & Description	Quantity	Unit Price	Total
OneTest Premium Pricing as of June 1 2024	35	\$345.00	\$10,505.25 after 13% discount <i>300,15</i>
Capillary Pain-free Collection Kit (optional) Capillary Collection Kit	35	\$25.00	\$875.00
Priority Return UPS/FedEX Shipping and Materials (up to 50 sample capacity to/from)	3	\$75.00	\$225.00
One-time subtotal			\$11,605.25 after \$1,569.75 discount
Total			\$11,605.25

Purchase terms

To get your first order started, all we would need is your signed quote, and a 10% deposit at time of order. The balance of testing will be billed Net30 days after tests are completed.
